**Prostate Cancer - Active Surveillance and More...
Past, Present, and Future**

**Wednesday September 29, 2021
8:00 PM - 9:30 PM ET**

Dr. Laurence Klotz is considered one of the "fathers" of active surveillance as well as focal therapy. He will be speaking about *"Prostate Cancer - Active Surveillance and More...Past, Present, and Future"*.

Dr. Klotz will cover how active surveillance was developed, its current standing as a strategy for managing men with low-risk to favorable intermediate-risk prostate cancer, and how developments, such as liquid biopsies and micro-ultrasound imaging may come into play for all.

He'll no doubt have some thoughts for more aggressive PCa, plus a few words to say about anxiety, and the role of support groups like AnCan.

Join us for this fascinating evening, and get your questions answered from the Pioneer himself!

Questions can be submitted ahead of time to joeg@ancan.org; *case-specific questions will not be considered.*

FEATURING

Laurence Klotz, MD

*Urologist and Scientist
Sunnybrook Hospital Toronto*
